

Activity-Based Delivery: Tailored. Flexible. Efficient.

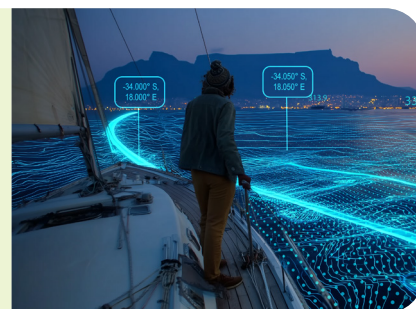

Start your FSP journey toward smarter, faster global trials

Your FSP challenges solved

What challenges are slowing your trials down?

- Struggling with fluctuating workloads that make full time resourcing inefficient and costly?
- Losing productivity and quality due to underutilized FTEs, misaligned resources or inconsistent delivery across regions?
- Needing a more agile model that adapts to your operational reality—not the other way around?

What is Activity-Based Delivery?

Fortrea's **Activity-Based Delivery** is designed with the aim of maximizing flexibility and cost efficiency. Instead of managing full-time equivalents (FTEs), Fortrea provides clinical service units—only what you need, exactly when you need it. You maintain full visibility and control, while Fortrea manages the operational complexity through structured workflows, trained delivery teams and governance aligned to your priorities.

Activity-Based Delivery is designed to tackle specialized or complex tasks, and bundles specific activities or deliverables into standardized units, such as:

- **Study startup:** Feasibility, site selection, EC/IRB submissions, budgeting and contracting
- **Clinical monitoring:** Blinded/unblinded monitoring, long-term follow-up, training and quality oversight
- **Centralized services:** TMF maintenance, trial administration and trip report review

Unlocking tangible benefits for your business

By aligning cost directly to output, **Activity-Based Delivery** can help eliminate waste, improve predictability and deliver high value results with agility:

- **Deliverables-based engagement:** Pay for outcomes, not headcount. Eliminate underutilization, reduce waste and improve ROI
- **Full oversight, lower operational risk:** You retain strategic control while Fortrea manages delivery through structured workflows and governance—without co-employment risk
- **Agility to match study demand:** Scale units of work up or down rapidly as timelines shift, new protocols are added or workload fluctuates
- **Accountability you can trust:** Fortrea owns responsibility for both resources and results, with transparent tracking and defined deliverables that give you confidence in performance from day one
- **Predictable budgeting and commercial advantage:** Unit-based pricing improves cost transparency, supports more accurate forecasting and can help optimize spend across portfolios with fluctuating activity levels

Activity-Based Delivery in action

Challenge: A sponsor faced an expanded trial portfolio with unblinded components with insufficient systems and teams in place to complete the work while maintaining the blind.

Goal: Successful transition of studies out of sponsor's native systems, and monitored by a specialized unblinded team.

Solution: Fortrea deployed an **Activity-Based unblinded monitoring model**, leveraging our systems, personnel and experience. Using Fortrea systems for unblinded monitoring, in this case, reduced the risk of unblinding by keeping blinded and unblinded components completely separate. Leveraging Fortrea FSP capacity, a 140+ person team was built in five months to meet this demand.

Value added:

Scalable, high-quality monitoring that safeguarded blind integrity and minimized risk.
Over the course of one year, Fortrea implemented:

Reduced risk

Separate CTMS and TMF to maintain the blind

Rapid scale

Scaled a team to support the transition and monitoring of 4,336 sites across 45 countries

Fortrea FSP: Innovative solutions, powered by experience

Our **Activity-Based Delivery** model is one of our innovative clinical FSP solutions, powered by deep industry experience.

With over 6,400+ FSP staff across 70+ countries, Fortrea is one of the largest FSP CROs in the world. Our global infrastructure supports in-country, regional, on-, near- and off-shore models, offering you flexibility and scalability. We can help you accelerate timelines, reduce risk and maximize portfolio performance where you need it most.

Backed by 120+ cross-functional relationships and a dedicated recruitment team, we bring deep knowledge and proven capabilities to every engagement. Long-term, decade-plus alliances and industry recognition underscore our commitment to quality and innovation. This commitment is reflected in our continuous investment in technology, enabling us to deliver efficient, high-quality solutions.

Contact our clinical FSP team today

Ready to scale your trials without the overhead of full-time hires? Your clinical trials deserve a smarter approach—one that adapts to your needs, optimizes resources and drives results. That's why Fortrea created the **Activity-Based Delivery** model.

Contact your Fortrea representative today to start your journey toward smarter, faster global trials.
