

The challenge

Sponsors often wait three to four weeks for pharmacokinetic (PK) results after data receipt while traditional processes often prioritize submission-ready deliverables. These factors often result in:

- **Obscured insights** until the end of the study, which slows timelines, increases uncertainty and limits agility
- **Delayed critical decisions** for Phase II/III trials
- **Delayed investor presentations**

To help support timelines and enable transparency in PK reporting, Fortrea has created:

PK reporting tool

Business benefits

- **Shortens delivery timelines** as PK insights are delivered within 24 hours instead of weeks
- **Accelerates timelines and reduces delays** to support faster go/no-go decisions for later phase trials
- **Improves transparency** so sponsors can stay informed throughout the study
- **Enhances data quality** by providing direct access to preliminary results within 24 hours
- **Enables enhanced decision-making** by providing rapid intelligence

Learn how PK reporting tool can provide intelligent data, accelerate decisions and supports faster reporting in early phase trials.

The Fortrea solution

PK reporting tool for early phase trials:

- **Delivers preliminary PK results** within 24 hours of receiving source data
- **Provides early access to interactive dashboards**, enabling real-time review of PK profiles, adverse events and summary statistics
- **Offers interactive review of participants**, specific interest AEs and drill-downs of PK parameters
- **Tailors outputs** with custom views and export options
- **Supports regulatory submission deliverables** by providing faster PK information and facilitating decision-making for later phase studies
