

The challenge

Clinical trial teams struggle to manage safety document distribution efficiently, leading to delays, manual effort and compliance risk due to:

- **Fragmented systems**
- **Manual processes**
- **Limited visibility**

SPEED (Safety Processing End-to-End Distribution) helps automate distribution, centralize tracking and enhance workflow visibility, aiming to streamline safety communication and strengthen compliance.

SPEED

Business benefits

By automating and centralizing safety document distribution, SPEED delivers operational value by helping to enhance efficiency, compliance and user experience. SPEED:

- **Assists in reducing manual workload** through automated distribution and tracking of critical safety documents
- **Aims to support compliance** with full auditability, clear acknowledgment tracking and streamlined workflows
- **Helps to increase operational visibility** with dashboards that highlight status, actions and outstanding items

Learn how SPEED can help enable faster, more reliable safety communication across clinical studies, strengthening operational efficiency and regulatory readiness.

The Fortrea solution

An automated portal that helps streamline the distribution, tracking and reconciliation of critical safety documents across clinical trial sites, sponsors and:

- **Provides digital platform safety documentation delivery** designed to help reduce manual workload and processing delays.
- **Centralizes tracking and acknowledgments** aiming for stronger compliance oversight.
- **Helps to enhance workflow visibility** with dashboards and secure, user-friendly access
- **Integrates with company clinical data systems** to support study setup and automated user provisioning
