

The challenge

Risk-based quality management (RBQM) in clinical trials helps prioritize, prevent and mitigate risks associated with patient safety and data integrity, but study teams often face:

- **Fragmented data across multiple systems**
- **Inefficiencies and delayed responses during the process**
- **Limited real-time visibility and predictive insights**

To help sponsors and teams identify and mitigate critical-to-quality risks proactively, Fortrea has created:

Xcellerate® RBQM

Business benefits

As it helps teams identify, prevent and respond to risks, Xcellerate® RBQM also:

- **Reduces operational complexity** by minimizing system silos
- **Helps support compliance and patient safety** by highlighting anomalies, trends and emerging risks
- **Enables data-driven decision-making across the trial lifecycle** as teams can make faster corrective actions and help improve trial performance

Learn how Xcellerate® RBQM unifies oversight, enables predictive insights and empowers smarter risk management.

The Fortrea solution

Xcellerate® RBQM is a suite of solutions designed for decision-making that:

- **Delivers intelligent insights** to support risk assessment and mitigation in a single platform
- **Offers an end-to-end risk lifecycle** with AI-supported capabilities and proprietary data to enable rapid detection of anomalies and trends
- **Streamlines tasks and workflow with integrated modules** that enable forecasting, categorization, study configuration, monitoring setup, centralized risk review, trend detection, scenario planning and cost-impact analysis
